## Introduction

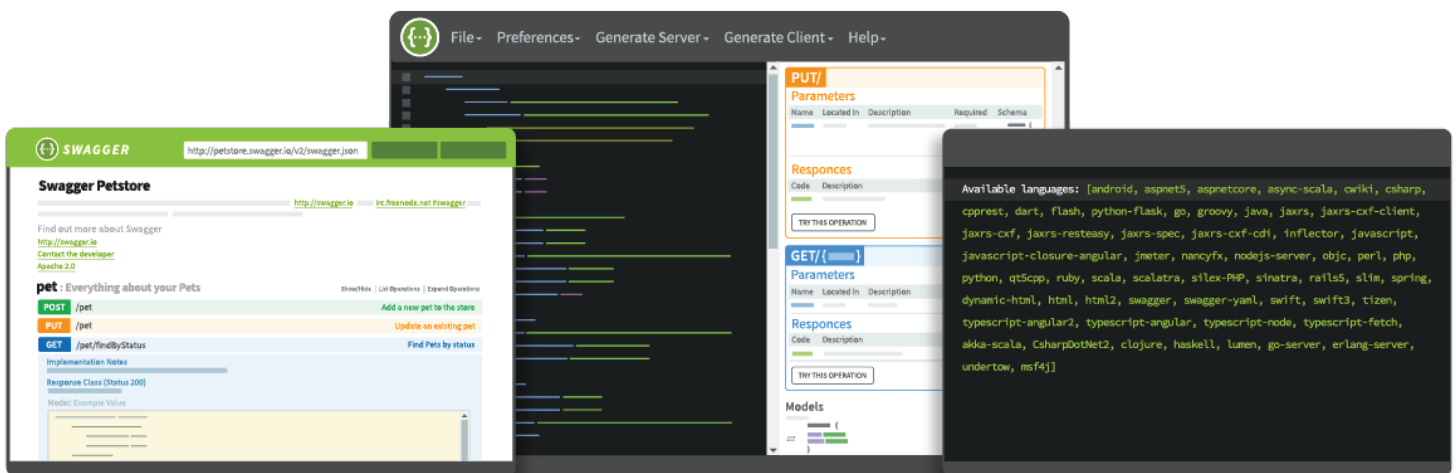

# THE WORLD'S MOST POPULAR API FRAMEWORK

---

HællTech uses Swagger, a powerful open source framework backed by a large ecosystem of tools that helps you design, build, document, and consume our RESTful APIs.

## THE CORE TOOLS

The API framework is supported by a set of core tools for designing, building, and documenting RESTful APIs.

SWAGGER CORE TOOLS

# SWAGGER

THE **WORLD'S MOST POPULAR** API FRAMEWORK

Swagger is a powerful open source framework backed by a large ecosystem of tools that helps you design, build, document, and consume your RESTful APIs.

Swagger

## WHAT IS SWAGGER?

---

Swagger allows you to describe the structure of your APIs so that machines can read them.

The ability of APIs to describe their own structure is the root of our decision to use tool.

By reading the API's structure, we can automatically build beautiful and interactive API documentation. We can also automatically generate client libraries for our API in many languages and explore other possibilities like automated testing.

Swagger does this by asking API to return YAML or JSON that contains a detailed description of our entire API. This file is essentially a resource listing of our API which adheres to OpenAPI Specification.

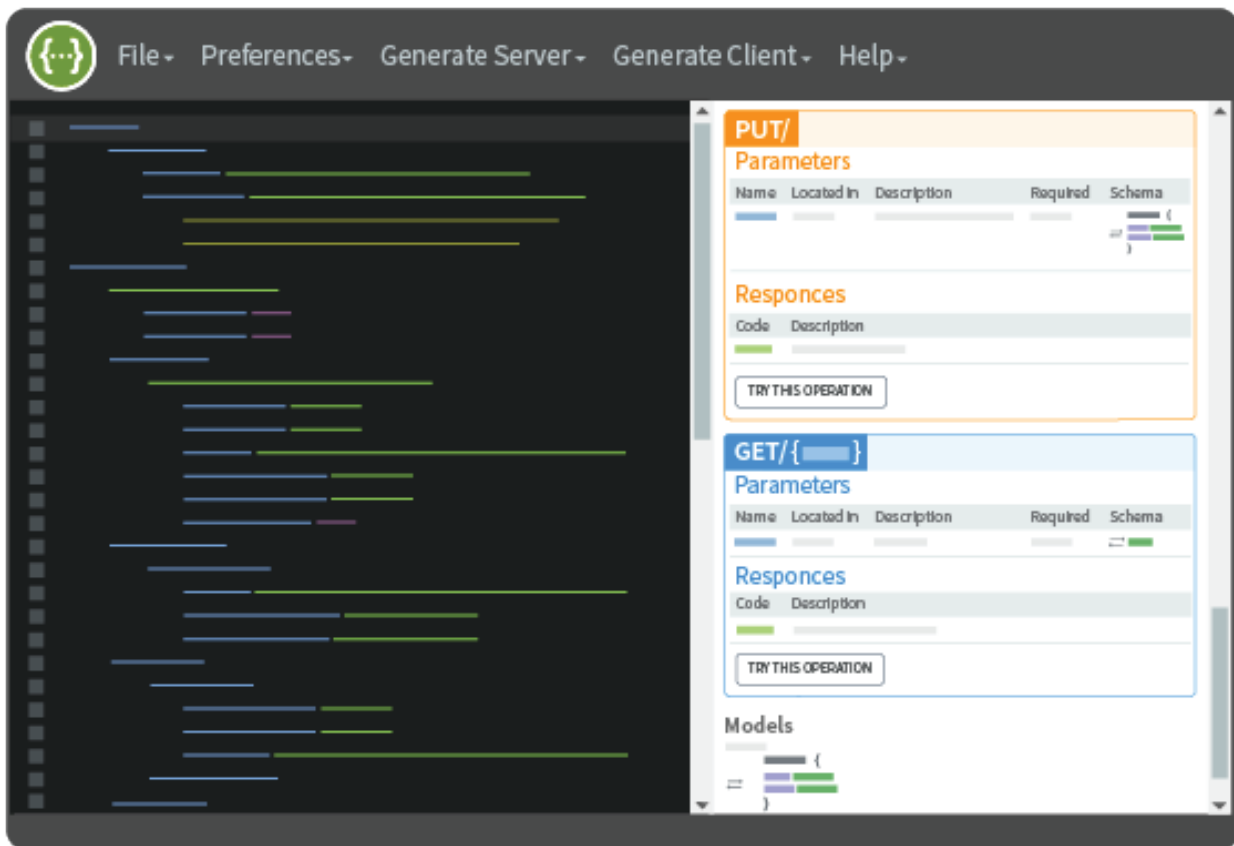

## Design

### DESIGN WITH SWAGGER EDITOR

---

API Swagger Editor is the best tool for quickly getting started with the Specification. Design new APIs or edit existing ones in a powerful Editor which visually renders your definition and provides real time error-feedback.

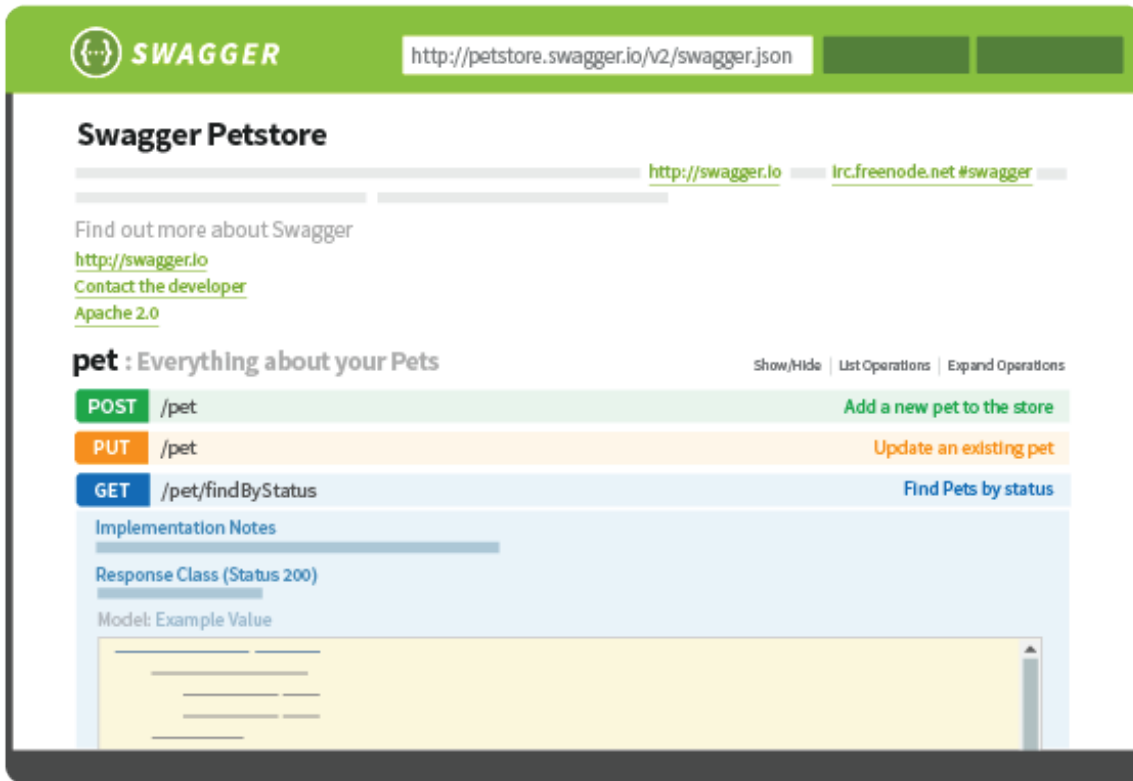

SWAGGER EDITOR

## Document

# DOCUMENT WITH SWAGGER UI

---

## SWAGGER UI

Swagger UI is the ultimate compliment of your Swagger specification, and automatically generates all the documentation described in the Swagger specification for visual interaction.

# OMNI COMMON API TOUCH POINTS

# HæalthTech

Within a rapidly evolving mobile landscape, we're combining the technological building blocks to create tools and platforms that focuses on highly cost effective, flexible web and mobile based health insurance and risk management systems.

Units 1203 & 1204 12th floor, ALPAP II Bldg, Trade Street corner Investment Drive, Madrigal Business Park,  
Ayala Alabang, Muntinlupa City.
